Add-ons

Designed to perfectly adapt your Kühner shaker to every unique application.

E.g., automated real-time imaging platform to monitor cell cultivations online

Customized shakers

Engineered to match your workflow, ensuring precision and flexibility.

E.g., SBM Shaker – for controlled thawing of cultivation broth

Are you ready to start your own custom project?

Your application deserves a perfect fit. **From custom clamps for unique vessels to integrated measuring systems and specialized shaker features,** we develop tailored solutions that adapt seamlessly to your workflow and fulfill your research demands.

Accessories

Developed to enhance your Kühner system for every laboratory application.

E.g., pin table & custom basket system for robotic workflows
